DETAILED ACTION

Applicants' arguments, filed 18 September 2002, have been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Claims 1-41 are currently pending. Claims 36-41 have been withdrawn from consideration as they are drawn to non-elected subject matter. Applicant is required to cancel those claims.

Specification

The substitute specification filed 23 December 2002 has been entered.

Claim Rejections - 35 USC § 112

Claims 1, 2, 20, 22, and all dependent claims are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 2, 20, 22, and dependent claims require that the set of pools of probes have different sequences in the "information regions of the probes". However, it is not clear from the specification what is meant by "information region" or how one would determine an information region in order to distinguish the probes from one another.
